SwasthyA SymboL

Swasthya Symbol collects simple information from users, workplaces and health services, analyses the combined signals, and shows an easy health status using colour indicators. It recommends the next action, such as monitoring, hydration, rest, a health check-up or urgent medical attention.

About Us

Swasthya Symbol is a preventive-health platform created to help farmers, labourers and industrial workers understand health risks at an early stage. Our goal is to connect personal symptoms, workplace conditions, environmental changes and health-service information in one simple system.
Through easy questions, basic health information and timely notifications, Swasthya Symbol helps users recognise possible warning signs and take the right next step—such as resting, drinking water, following preventive advice or arranging a health check-up.

We believe healthcare should not begin only after a person becomes seriously ill. It should begin with early awareness, simple guidance and timely action. Swasthya Symbol supports this vision while protecting user privacy and making it clear that the platform provides risk screening, not a final medical diagnosis.

Our Vision

We strive to create a safer and healthier working community where everyone, regardless of their background or location, has access to simple, reliable, and understandable health information.

At Swasthya Symbol, we envision a future where technology helps prevent health problems before they become serious.
By bringing together personal health symptoms, workplace hazards, and environmental conditions, our AI-powered platform aims to provide early risk awareness, personalized preventive guidance, and timely health alerts.

Vision 01

"A future where every worker can identify health risks early, understand warning signs, and take preventive action before minor health issues become serious."

Vision 02

"To build an intelligent, accessible, and inclusive healthcare ecosystem where AI helps protect workers through early risk awareness and preventive guidance."

Our Mission

Mission 01

"To empower farmers, labourers, and industrial workers with accessible health information, early risk awareness, and practical preventive guidance for a healthier and safer life."

Mission 02

"To create a proactive health-awareness ecosystem that protects working communities through early warnings, preventive education, and timely access to appropriate healthcare guidance."

*At **Swasthya Symbol**, our mission is to empower farmers, labourers, and industrial workers with the knowledge and tools needed to understand potential health risks before they become serious.*
By combining artificial intelligence, symptom-based risk screening, environmental monitoring, and workplace safety awareness, we aim to provide simple, personalised, and timely preventive health guidance.
We are committed to breaking barriers of language, accessibility, and health literacy, ensuring that essential health information reaches the communities that need it most.
